## EDUCATION

**Carleton University, Ottawa**

*September 2019 – May 2024*

### Bachelor of Computer Science (Honours)

- Achieved A+ in Discrete Structure, Web Applications, Computer System Security, and Distributed OS
- Proficient in multiple programming languages (Python, Java, C, C++, JavaScript, HTML), with confidence and experience in database management

## APPLIED PROJECTS

### Interactive Ubuntu Terminal Simulator (Personal Project)

*October 2024*

- Developed a fully functional Ubuntu terminal simulator with JavaScript, HTML, and CSS, featuring a dynamic GUI and realistic command-line behavior for an intuitive user experience
- Implemented over 10 commonly used Unix commands, providing natural behavior and functionality consistent with an authentic terminal, enhancing the realism of the simulation

### Static HTML Portfolio (Personal Project)

*September 2024 - present*

- Developing a static HTML portfolio website hosted on GitHub Pages to showcase projects, professional experience, and personal background
- Customizing a free HTML/CSS template to implement responsive design and interactive features, enhancing user experience with minimal modifications
- Integrating project details, skills, and contact information into a clean, structured layout for professional visibility

### Sudoku Game/Solver (Personal Project)

*August 2024*

- Developed a Python-based game with Graphical User Interface using TKinter library
- Employed an advanced backtracking algorithm combined with real-life Sudoku penciling techniques to instantly solve any Sudoku board

### OASIS Pro (Health Product) Simulator (School Group Project)

*April 2022*

- Led group of four to create an interactive application in C++ using Qt framework
- Replicated product behavior with responsive buttons, accurately simulating backend logic and responses

## PROFESSIONAL EXPERIENCE

### BlackBerry QNX

*May 2022 – Dec 2022*

#### Command Line Tools (Co-op/Internship)

- Focused on **Linux OS**, **Bash scripting**, **Python scripting**, and **C programming**
- Tested compatibility of over 300 **GNU** commands and their flags in BlackBerry's **QNX** OS
- Enhanced and added five features to **front-end** and **back-end** of software usage tracking tool using HTML, Python, JavaScript scripting as base code
- Conducted extensive Python automation scripting, utilizing **Pytest** to automatically check status of over 40 QNX targets using the **Paramiko SSH library**
- Performed bug testing on 40 'verification' **JIRA tickets** to ensure bug fixes work correctly
- Responsible for resolving over 20 JIRA bug tickets submitted by other testers and BlackBerry's customers, utilizing advanced debugging tools such as **GDB** and **PDB**
- Developed **Python log parser** to extract and convert data from over 250,000 test logs on internal report server database into easily readable format

## SKILLS

**Languages:** Python, Java, C, C++, BASH, Shell, HTML, CSS, JavaScript, MatLab, Lisp, SQL

**Frameworks:** Node.js, Qt

**Tools:** Pytest, TKinter, GDB/PDB, Visual Studio Code, Git, Dr Racket, SQLite, RESTful API, Linux, Windows OS, Oracle VM VirtualBox
