EDUCATION

Carleton University (Ottawa, Ontario, Canada)

September 2019 – May 2024

Bachelor of Computer Science (Honours)

- In-depth understanding of Discrete Structures, Web Applications, Computer System Security, and Distributed Operating Systems
- Proficient in multiple programming languages (Python, Java, C, C++, JavaScript, HTML), with hands-on experience in database management

APPLIED PROJECTS

Web-Based Electrical Cabinet Configurator (Freelance Project)

June 2026 – Present

- Building an extensive device library where users select from a catalog of pre-built components, each with detailed specifications and high-resolution imagery, and arrange them into a complete cabinet configuration
- Placing and validating components on an interactive **canvas** in real time using millimeter-accurate, real-world measurements
- Standardizing the entire cabinet design workflow to produce consistent documents, diagrams, parts lists, and quotes for every project
- **Tools & Frameworks:** React 19 + TypeScript (strict), Konva (interactive canvas), Vite, and Cloudflare Workers

B2B M&E Solutions Website (Freelance Project)

June 2026 – Present

- Designing a modern, minimalist interface with clean typography, generous whitespace, and refined micro-interactions, delivering a smooth, polished browsing experience across all devices
- Integrating a **headless CMS** so non-technical editors can independently create and publish content, projects, news, and products without any developer involvement
- Optimizing **SEO** and **AIO** (canonical tags, structured metadata, semantic markup) while passing rigorous performance and accessibility audits, scoring highly on Lighthouse and PageSpeed Insights
- **Tools & Frameworks:** Next.js 15 (App Router), TypeScript, Tailwind CSS v4, Sanity CMS, Cloudflare Workers, Resend (Email inquiry handler), Google Analytics 4

GitHub Page Portfolio (Personal Project)

2024 – Present

- Developed a static HTML portfolio website hosted on GitHub Pages to showcase projects, professional experience, and personal background
- Adapted a lightweight HTML/CSS template into a responsive, interactive layout with clean, maintainable code
- Integrated project details, skills, and contact information into a clean, structured layout for professional visibility
- Continuously adding new projects and refining the site's overall design and content

PROFESSIONAL EXPERIENCE

BlackBerry QNX (Kanata, Ontario, Canada)

May 2022 – Dec 2022

Software Developer (Co-op/Internship)

- Focused on **Unix**, Linux OS, **Bash** scripting, **Python** scripting, and **C** programming
- Tested compatibility of over 300 GNU commands and their flags in BlackBerry's **QNX OS**
- Performed verification testing on 40+ JIRA tickets and resolved 20+ bug tickets reported by testers and BlackBerry customers
- Developed a Python log parser to extract and convert data from 250,000+ test logs in the internal report-server database into a readable format

SKILLS

Languages: Python, Java, C, C++, Bash, HTML, CSS, JavaScript, TypeScript

Frameworks & Libraries: React 19, Next.js, Astro, Node.js, Tailwind CSS, Qt, PyQt, Tkinter, Konva

Tools & Platforms: Git, Pytest, GDB/PDB, SQLite, Sanity CMS, Linux, Windows, VirtualBox, CVAT, YOLO
